The chemical researches carried out during the period
1917-1942 in laboratories directly attached to the
Academy of Sciences are listed without reporting their
details or giving specific references. A great expansion
of the scope of chemical research is revealed with an
ever increasing tie with various industries of U. S. & R.,
although the primary purpose of the review is given as a
discussion of the new trends in chemistry which origi-
nated during the above mentioned period. (Author)
